

SEED CONTROLLER

**X20 Seed Controller
excels in simplicity of use and
ease of calibration**

- INTEGRATED CONTROLLER, GUIDANCE AND STEERING ASSIST CONSOLE
- SINGLE CONSOLE IN CABIN
- UP TO 5 BINS OR TANKS CONTROL, INCLUDING GRANULAR, LIQUID AND NH_3
- VARIABLE RATE CONTROL OPTION ON ALL BINS AND TANKS
- BLOCKED HEAD MONITOR OPTION

It's time.

X20 Seed Controller from Topcon Precision Agriculture is a fully featured seed rate controller capable of handling up to five different products including granular, liquid and NH₃. The X20 is the first console available with true multi-tasking ability to seed, provide steering assist with full guidance, variable rate control all bins as well as Auto Section Control (ASC) with AgCam and Weather Station - all simultaneously from a single console.

Variable Rate Control

X20 Seed Controller provides optional Variable Rate Control (VRC) with Mapping. With this combination, the X20 can simultaneously apply from prescription maps, control and record all products, and generate real-time application and log maps. This makes X20 one of the most powerful precision agriculture systems available today.

Mapping

Users can create exclusion zones, set the application rate, and even lock-in these settings before the operator leaves the yard. Logs and application maps can be saved, printed or e-mailed using standard Windows® programs (additional hardware or software may be required). With the X20 you can also generate your own prescription maps matched to field history and physical features of the land.

Versatile

The X20 Seed Controller features the capability to drive electric motors, proportional and MFC hydraulic valves, hydraulic motors, and actuators.

Key Features

Integrated controller, guidance and steering assist console

Up to 5 bin control, including granular, liquid and NH₃

Import prescription maps for precision farming

Single full color touch-screen console in cabin

Variable Rate Control option on all bins

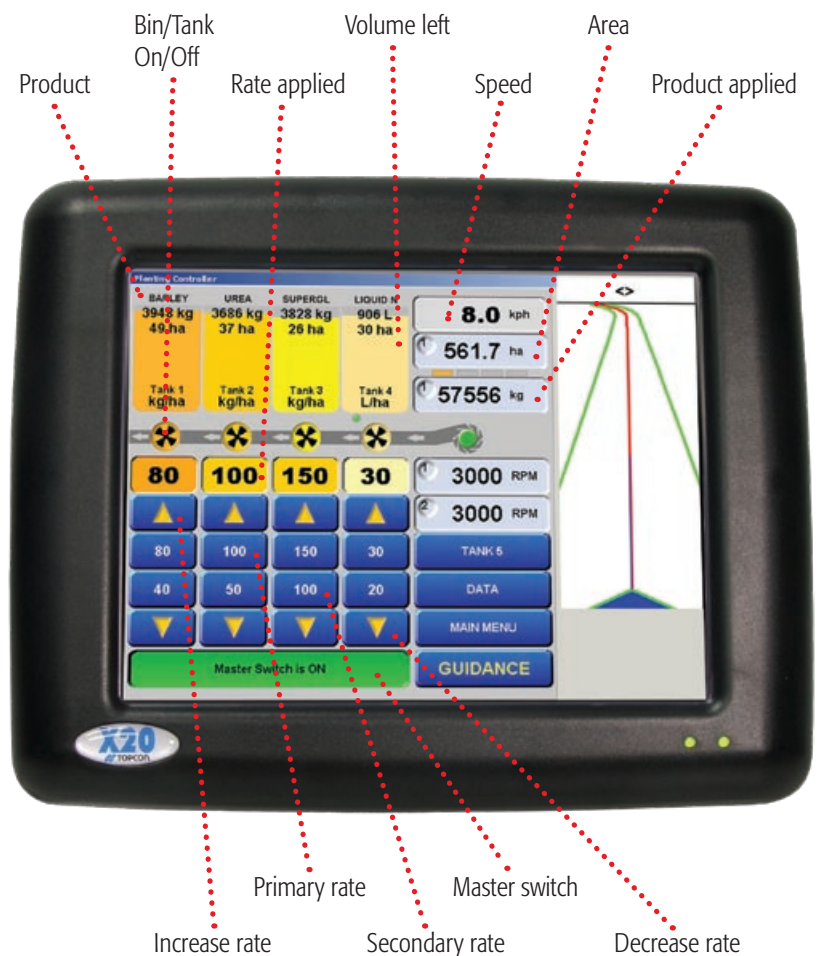

Voice alarms on all functions

Simple to calibrate and use

Metric US or English units

Multiple fan monitoring

Topcon's easy-to-use, bright, full color information at the operator's fingertips.
